Regras para Exercíco de Opções

Para que o exercício automático de uma opção possa acontecer, é necessário que o cliente titular detenha um patrimônio* de, no mínimo, 5% do valor a mercado do exercício (valor de fechamento do ativo objeto da opção x quantidade de opções). Caso o cliente possua um patrimônio inferior, o exercício da opção poderá ser bloqueado, mesmo que dentro do dinheiro.

Caso o patrimônio do cliente não seja suficiente para o exercício de todas as suas opções, poderão ser empregados os melhores esforços para que sejam, prioritariamente, exercidas as opções com maior lucratividade para o cliente.

**o patrimônio elegível não considera o valor aplicado em previdência privada*
